MAY 2019

Last Day of School

End of Year Celebration!

May 15 at 9:45am Join us for songs,

slide show of our great year
and PK graduation.

Followed by refreshments.

April was full of insects, bugs, butterflies and flowers.

We've enjoyed working in the flower shop, selling flowers, playing in the dirt and studying bugs. Just like a butterfly's proboscis, we sipped nectar using a long thin straw. We learned about the life cycle changes of the butterfly. From caterpillar to butterfly. We enjoyed being scientist learning about a variety of insects. We were as strong as Ants and as busy as Bees!

The PS group was busy finding worms that matched the birds. They always enjoy the over size cushions and the assortment of books in the reading area. After reading the duck story they loved playing the duck game matching colors and shapes.

After learning about beetles and ants the PK class was busy drawing bugs and using watercolor paint to blow across their papers. After reading In the Tall, Tall Grass the PK group made bugs and used scissor skills to cut grass

HEAD

THORAX

ABDOMEN

We made tasty bugs using an assortment of fresh vegetables and fruit. The children used apple slices, oranges and cucumbers for wings, sweet yellow peppers for antenna, and carrots for bodies. The PS class is drawing lines connecting bugs to their homes, counting & building caterpillars and painting black ants.

The PK class was tossing numbered ladybugs to its corresponding number on the mat. Using scooters the PK class followed the trail around the obstacle course.

HOAGIE SALES

THANK YOU ! You made this year a success! Whether you sold hoagies or gave a donation each month, we Thank you! Your willingness to support our hoagie sale each month enables us to keep tuition affordable and supplement our supplies. We also send a big Thank You to NORTH SHORE DELI and the owners Katie & Karl Mattern for providing top quality hoagies that keep us ordering more each month!
